

msaJustPyUI Module

.justpy.gridcomponents

Attributes

Classes

AgGrid

Bases: `JustpyBaseComponent`

Attributes

`allowed_events` instance-attribute

```
allowed_events = []
```

`auto_size` instance-attribute

```
auto_size = True
```

`classes` instance-attribute

```
classes = ''
```

`default_grid_options` class-attribute

```
default_grid_options = {  
    "animateRows": True,  
    "rowDragManaged": True,  
    "defaultColDef": {  
        "filter": True,  
        "sortable": True,  
        "resizable": True,  
        "unSortIcon": True,  
        "cellStyle": {"textAlign": "center"},  
        "headerClass": "font-bold",
```

```
    },  
    "columnDefs": [],  
    "rowData": [],  
  }
```

evaluate instance-attribute

```
evaluate = []
```

html_columns instance-attribute

```
html_columns = []
```

options instance-attribute

```
options = Dict(self.default_grid_options)
```

pages instance-attribute

```
pages = {}
```

row_data_converter instance-attribute

```
row_data_converter = None
```

show instance-attribute

```
show = True
```

style instance-attribute

```
style = "height: 99vh; width: 99%; margin: 0.25rem; padding: 0.25rem;"
```

theme instance-attribute

```
theme = 'ag-theme-balham'
```

vue_type class-attribute

```
vue_type = 'grid'
```

Functions

`__init__`

```
__init__(**kwargs)
```

`__repr__`

```
__repr__()
```

`__setattr__`

```
__setattr__(key, value)
```

`add_to`

```
add_to(*args)
```

`add_to_page`

```
add_to_page(wp: WebPage)
```

`apply_transaction` async

```
apply_transaction(transaction, page)
```

`convert_object_to_dict`

```
convert_object_to_dict()
```

convert object to dict

`deselect_rows` async

```
deselect_rows(page)
```

`load_json`

```
load_json(options_string)
```

load_json_from_file

```
load_json_from_file(file_name)
```

load_pandas_frame

```
load_pandas_frame(df)
```

on

```
on(event_type, func, **kwargs)
```

react

```
react(data)
```

run_api async

```
run_api(command, page)
```

select_all_rows async

```
select_all_rows(page)
```
